EC Web Sites Using the "Template 2009" for great web sites

This template (and it's black and white brother "Template 2009 Black/White") have been created to get a neat looking web site set up very quickly and easily.

See an example here: - <http://www.easybusinesssuccess.com/>

The main header image is placed into the /myfiles/ folder and then the main EC Toolset administrator points to that file in the "Edit User" or "New User" set up section.

This image can be used as a starting point for the header background: -

www.ectoolset.com/images/template-2009-back.jpg

If you want to create your own use the image size 764 X 199

Enter your content into the editor and use the "Bottom Navigation" options to link pages together.
