

Adding a Thumbnail with Linked Larger Image

Create your 2 images, one small and one large; save as either .jpg or a .gif filetypes.

Keep in mind that you can only upload 100kb or less sized images via the e-c editor.

Anything with a larger filesize than 100kb will require a separate FTP app to upload.

Upload your 2 images then add the small "thumbnail" version into your page.

Make sure the thumbnail image is selected - left click it if not already.

Click the "Hyperlink" icon; in the popup, within the "source" dropdown menu, select "http://".

In the field to the right of the dropdown add the path to your larger image, in this format...

"your webaddress"/myimages/"your big image"

ie.

www.e-c.co.nz/myimages/yourbigimage.jpg

In the "Target" dropdown select "Blank"... this will make your big image open in it's own window.

Click "Insert", then "OK"

Save your page, publish it, then click "View" to proof it.
